ENCLOSURES

Espressione di un nuovo modo di concepire lo spazio doccia, pensato come regno dell'eleganza, della trasparenza e della modularità, Enclosures presenta diversi modelli di chiusura, con infinite varianti e misure, da scegliere e accostare secondo i dettami della personalità. Non adattare i tuoi gusti all'ambiente, crea il tuo ambiente secondo le tue inclinazioni.

Expression d'un espace douche d'inspiration nouvelle, conçu comme le règne de l'élégance, de la transparence et de la modularité, Enclosures propose plusieurs modèles de parois, avec une variété infinie de dimensions à choisir et à assembler à son propre gré. N'adaptez pas vos goûts à votre environnement, créez votre environnement selon vos propres goûts.

A new way of conceiving the shower space, where elegance, transparency and modularity reign supreme, Enclosures offers a wide choice of enclosures with different sizes and aesthetics. Models and sizes can be matched as desired in order to have a personalized shower space.

SHINING GLASS®
incluso_compris_included

crystalli verres_glasses

Glass 1989 su tutte le proprie gamme di chiusure doccia utilizza cristalli temperati di sicurezza, conformi alle principali norme internazionali: su tutte le collezioni viene applicato di serie il trattamento Shining Glass che riduce l'adesione di sporco e calcare sui cristalli, ne facilita la pulizia e ne conserva la brillantezza più a lungo.

Sur toutes les gammes de parois de douche Glass 1989 utilise du verre trempé de sécurité, conformément aux normes internationales. Le verre est toujours traité avec un anticalcaire, ShiningGlass, qui réduit l'adhésion du calcaire et facilite le nettoyage de la paroi.

Glass 1989 shower enclosures are all produced with tempered safety glass, compliant with international regulations. Shining Glass treatment is standard on all collections: this treatment reduces dirt and limescale deposits on glass, makes cleaning easier and maintains glass brilliance for longer.

profili personalizzati

profilés personnalisés_customized profiles

La personalizzazione dell'area doccia non si limita soltanto alla possibilità di adattare perfettamente la chiusura allo spazio a disposizione con soluzioni su misura o speciali, ma si gioca anche attraverso la scelta di un colore RAL o di una finitura metallizzata come elemento distintivo e fortemente caratterizzante.

Les parois de douche Glass 1989 peuvent être personnalisées non seulement dans les dimensions et les solutions, mais aussi en choisissant une couleur Ral ou une finition métal pour la finition des profilés et composants accessoires.

Customization of the shower space does not only mean adapting the shower enclosure to your bathroom through MTM or special solutions, but it is also interpreted by using a RAL colour or a metal finish as a distinctive and characterizing feature.

moov

Pensata per spazi doccia ampi, Moov scorre su cuscinetti a sfera integrati sul binario superiore che garantiscono fluidità e silenziosità nel movimento. Il meccanismo Soft-close ammortizza la porta in fase di apertura e chiusura.

Conçue pour des espaces douche de grandes dimensions, Moov coulisse sur des roulements à billes intégrés dans le rail supérieur, spécialement développés pour garantir un mouvement fluide et silencieux. Le mécanisme Soft-close amortit la porte en ouverture et fermeture, en contribuant à en augmenter le confort.

Conceived for large shower areas, Moov runs on ball bearings integrated in the top rail to guarantee smooth quiet travel. Soft-Close mechanism cushions both door opening and closing.

Aggiungere sempre all'ordine il modulo di presa misura (con/senza piatto doccia), richiedendo la presa misura al nostro CAT o a personale specializzato. La chiusura si adatta anche a montaggio a pavimento, con il vetro in linea con il perimetro del piatto. Specificare sempre il tipo di installazione sul modulo. Per il montaggio fare riferimento alla scheda tecnica di prodotto scaricabile dal sito.

Cet article est toujours réalisé sur mesure, suivant les indications fournies sur la fiche de prise de mesure disponible sur notre site web www.glass1989.it. Joindre toujours à la commande la fiche de prise de mesure (avec/sans receveur), en faisant effectuer la prise de mesure par notre SAV ou par du personnel spécialisé. La paroi peut aussi être montée au sol, avec le verre en ligne avec le périmètre du receveur. Spécifier toujours le type d'installation sur la fiche. Pour le montage se référer à la fiche technique de produit disponible sur notre site.

This article is only available made to measure, upon submission of the measuring form downloadable from the website www.glass1989.it. Always add the measuring form (with / without shower tray) to the order, the measurement should be taken by our aftersales or by specialized personnel. The enclosure is also suitable for floor mounted installation, with glass in line with the perimeter of the shower tray. Always specify the type of installation on the module. For installation refer to the product technical data sheet downloadable from the website.

Vertical gasket ACC0444 - wall side. See page 198.

Aggiungere sempre all'ordine il modulo di presa misura (con/senza piatto doccia), richiedendo la presa misura al nostro CAT o a personale specializzato. La chiusura si adatta anche a montaggio a pavimento, con il vetro in linea con il perimetro del piatto. Specificare sempre il tipo di installazione sul modulo. Per il montaggio fare riferimento alla scheda tecnica di prodotto scaricabile dal sito.

Cet article est toujours réalisé sur mesure, suivant les indications fournies sur la fiche de prise de mesure disponible sur notre site web www.glass1989.it. Joindre toujours à la commande la fiche de prise de mesure (avec/sans receveur), en faisant effectuer la prise de mesure par notre SAV ou par du personnel spécialisé. La paroi peut aussi être montée au sol, avec le verre en ligne avec le périmètre du receveur. Spécifier toujours le type d'installation sur la fiche. Pour le montage se référer à la fiche technique de produit disponible sur notre site.

This article is only available made to measure, upon submission of the measuring form downloadable from the website www.glass1989.it. Always add the measuring form (with / without shower tray) to the order, the measurement should be taken by our aftersales or by specialized personnel. The enclosure is also suitable for floor mounted installation, with glass in line with the perimeter of the shower tray. Always specify the type of installation on the module. For installation refer to the product technical data sheet downloadable from the website.

Con profili nero opaco per un tocco elegante e contemporaneo, cromati per un approccio più trasversale, colorati di un RAL a piacere o in una finitura metallizzata per la massima personalizzazione, la gamma Batik propone porte pivot, saloon e soffietto.

Avec des profilés noir mat pour un goût élégant et contemporain, chromés brillant pour une approche plus conventionnelle, ou personnalisés avec une couleur RAL au choix ou finition métal, la gamme Batik propose des solutions avec porte pivotante, basculante et pliantes.

With matt black profiles for a stylish and contemporary taste, brilliant for a more conventional approach, coloured with a RAL color of your choice or with a metal finish for the maximum customization, Batik range is highly versatile and offers pivot, saloon and bi-fold solutions.

meta

Una chiusura doccia scorrevole con foro maniglia sagomato sul vetro, perfetta per chi cerca una soluzione dall'estetica minimale.
Con Meta è possibile avere i profili di qualsiasi colore RAL o in tre finiture Metal, per personalizzare lo spazio doccia secondo i propri gusti.

Une paroi de douche avec poignée percée dans le verre, idéale pour une solution extrêmement minimale. La gamme Meta propose ses profilés en finition Ral au choix ou en trois finitions métal, pour personnaliser au maximum l'espace douche.

A shower enclosure with a hole shaped handle within the glass door, perfect for those who look for a minimal, aesthetic solution.
With Meta you can choose any RAL colour or a metal finish for the profiles, in order to customize the shower space according to your taste.

soho

Collezione dall'estetica minimale e contemporanea, Soho propone un'ampia gamma di configurazioni e di aperture: scorrevole, pivot, saloon, battente e walk-in.

La caractéristique la plus intéressante de Soho est la très vaste gamme d'ouvertures proposées - coulissante, battante, pivot, saloon et walk-in - associée à une esthétique résolument contemporaine.

Outstanding range with minimal and contemporary design, Soho features a wide choice of door openings: sliding, pivoting, saloon, swinging and walk-in.

Vademecum

Guide_Guide

Presamisure_Relevé Des Mesures_Measure-Taking

Una corretta rilevazione delle misure è fondamentale per ottenere il migliore risultato estetico e funzionale.

- si raccomanda di prendere le misure dopo aver posato il piatto doccia ed il rivestimento a parete
 - la misura da rilevare va dal rivestimento a parete fino all'esterno piatto
 - Nel caso di chiusura a nicchia, si raccomanda di rilevare le misure a 20 cm, 100 cm e a 180 cm circa di altezza dal piatto doccia.
 - verificare che il piatto doccia sia in bolla
 - Controllare sempre il raggio di curvatura per i piatti semicircolari
 - verificare la messa a piombo delle pareti, in casi rilevanti comunicare il fuori piombo
 - verificare che l'angolo tra le pareti sia di 90°
 - verificare la presenza di impedimenti al montaggio come torelli, piastrelle molto irregolari ecc.
 - nel caso di piatti doccia a filo pavimento accertarsi che il piatto sia complanare al pavimento lungo tutti i lati e comunicare se è richiesta l'installazione in sormonto alla giunzione tra piatto e pavimento (non tutti i modelli si prestano a questo tipo di installazione).
- Compilare il Modulo di Rilievo presente nell'area download del sito www.glass1989.it alla sezione modulistica, per trasmettere l'ordine o richiedere la fattibilità della soluzione richiesta.
- I Centri assistenza autorizzati Glass effettuano i rilievi misure a pagamento compilando e riconsegnando al rivenditore il modulo completo dei dati necessari per trasmettere l'ordine.

Un relevé correct des mesures est fondamental pour obtenir le meilleur résultat esthétique et fonctionnel.

- il est recommandé de prendre les mesures après avoir posé le receveur et le revêtement mural
 - la mesure à relever va du revêtement mural jusqu'à l'extérieur du receveur
 - En cas de paroi de douche en niche, il est recommandé d'effectuer des mesures à 20 cm, 100 cm et 180 cm de hauteur environ à partir du receveur de douche.
 - s'assurer que le receveur soit à niveau
 - Toujours vérifier le rayon du côté courbé pour les receveurs quart de ronds.
 - s'assurer que les murs soient d'aplomb, communiquer au cas si les murs ne sont pas d'équerre
 - s'assurer que l'angle entre les murs soit de 90°
 - vérifier la présence d'empêchements au montage comme les tores, les carreaux très irréguliers etc.
 - en cas de receveur au ras du sol, s'assurer que le receveur soit coplanaire au sol le long de tous les côtés et communiquer s'il faut que l'installation chevauche la jonction entre le receveur et le sol (tous les modèles ne se prêtent pas à ce type d'installation).
- Remplir la fiche de Prise de Mesure déchargeable de www.glass1989.it, pour transmettre la commande ou demander la faisabilité de la solution désirée.
- Les Centres d'assistance autorisés Glass effectuent les relevés des mesures avec facturation en remplissant et en remettant au revendeur le formulaire contenant toutes les données nécessaires pour transmettre la commande.

Taking measurements properly is crucial to achieving the best aesthetic and functional results.

- it is recommended to take the measurements after having laid the shower tray and the wall lining
- measurement must be taken starting from the wall lining to the outside of the shower tray
- for niche shower enclosure, it is recommended to take height measurements at 20 cm, 100 cm and 180 cm from the shower tray.
- check that the shower tray is levelled
- check always the radius of quarter round shower trays.
- check that the walls are plumb; in significant cases, report the plumb line deviation
- check that the angle between the walls is 90°
- check whether there are any assembly obstructions such as bullnose tiles, very irregular tiles etc.
- in the event of flush-to-floor shower trays, make sure that the shower tray is flush to the floor on all sides; report whether the shower enclosure needs to be installed overlapping the joint between the tray and the floor (not all models are suitable for this type of installation).

Fill in the Measure-Taking Form downloadable from www.glass1989.it / forms section to send the order or request the feasibility of the required solution.

Authorised Glass after-sales centres can take the measurements for a fee, completing and returning the form to the dealer with all the data required to send the order.

Installazione_Installation_Installation

Il fissaggio dei montanti a muro è di norma la prima operazione da effettuare nel montaggio del box doccia; è bene accertarsi di aver correttamente interpretato le quote di installazione presenti sulle istruzioni, in caso di dubbi contattare il Servizio Clienti Glass.

I tasselli forniti con il prodotto sono adatti solo per alcuni tipi di pareti, cioè con una consistenza tale da permettere l'espansione del tassello. Per il fissaggio su pareti di scarsa consistenza come ad esempio cartongesso e polistirolo o nel caso di presenza di porte scrigno non usare i tasselli forniti ma munirsi di quelli appositi a seconda della tipologia della parete.

A montaggio completato è necessario effettuare la siliconatura nei punti previsti sul manuale di montaggio. Utilizzare siliconi di buona qualità, accertandosi che questi non danneggino la superficie di applicazione.

La fixation des montants au mur est en général la première opération à effectuer lors du montage de la cabine de douche; s'assurer d'avoir correctement interprété les cotes d'installation présentes sur les instructions, en cas de doutes contacter le Service Clients Glass.

Les chevilles fournies avec le produit ne sont adaptées que pour certains types de murs, c'est-à-dire ayant une consistance telle à permettre l'expansion de la cheville. Pour la fixation sur des murs ayant une consistance insuffisante, comme par exemple le plâtré et le polystyrène, ou en cas de présence de portes coffrets, ne pas utiliser les chevilles fournies mais se munir de chevilles appropriées au type de mur.

Le montage terminé, il est nécessaire de siliconer les points prévus sur le manuel de montage. Utiliser des silicones de bonne qualité, en s'assurant que ceux-ci n'endommagent pas la surface d'application.

Installing wall profiles is usually the first thing to do when mounting the shower enclosures; make sure you are fully aware of the installation parameters featured in the instructions, otherwise please contact Glass Customer Service.

Rawlplugs supplied with the product are only suitable for certain types of walls, i.e. with a consistency that allows for the expansion of the plug. When mounting on walls of poor consistency such as plasterboard and polystyrene, or when there are pocket doors, do not use the plugs supplied but instead use the ones which are appropriate to the type of wall.

Once installation is complete, apply silicone in all points required according to the installation manual. Use good quality silicone, making sure that it does not damage the application surface.

Manutenzione_Entretien_Maintenance

Un montaggio qualificato e una corretta manutenzione sono requisiti fondamentali per fruire al meglio della qualità Glass 1989.

Particolarmente importante è limitare l'applicazione del silicone alle zone indicate: ogni cabina è infatti progettata per ridurne al minimo l'utilizzo.

Sono consigliati dei controlli periodici delle cabine, in quanto le sollecitazioni dovute all'utilizzo e al peso possono causare dei cambiamenti di funzione. Diversamente, se le stesse non vengono utilizzate per un tempo prolungato, è raccomandabile l'utilizzo di un liquido lubrificante sulle componenti meccaniche.

Attenzione speciale è da riservare ai materiali di consumo: nello specifico si consiglia di sostituire le guarnizioni ogni 2 - 3 anni, a seconda della frequenza di utilizzo.

Un montage par du personnel qualifié et un entretien correct sont des éléments nécessaires pour profiter au mieux de la qualité Glass 1989. Il est particulièrement important de limiter l'application de silicone dans les zones indiquées:

en effet, chaque cabine a été conçue pour réduire au minimum l'utilisation de ce produit.

Il est conseillé de contrôler périodiquement les parois, car les sollicitations importantes dues à l'utilisation et au poids peuvent altérer le fonctionnement. En revanche, en cas de non-utilisation des parois pendant une période prolongée, il est recommandé d'apporter un liquide lubrifiant sur les composants mécaniques.

Il est important de prêter une attention particulière aux matériaux sujets à l'usure: il est particulièrement conseillé de remplacer les joints tous les 2 - 3 ans, en fonction de la fréquence d'utilisation.

Proper installation and correct maintenance are essential for enjoying Glass 1989 quality to the full.

It is particularly important to limit the application of silicone to the indicated areas: every shower enclosure is designed to reduce its use to minimum.

Periodic controls of the shower enclosures are recommended since stress due to use and weight could cause changes in function. If they are not used for any length of time, it is advisable to apply a lubricant liquid to the mechanical parts.

Special attention should be paid to wearing off materials: more specifically it is recommended to change the gaskets once every 2 - 3 years, depending on the frequency of use.

Pulizia_Nettoyage_Cleaning

Asciugare il prodotto dopo ogni utilizzo previene la formazione di calcare sui cristalli.

Nel caso di forti depositi calcarei si consiglia di utilizzare succo di limone.

Attenzione: Non utilizzare succo di limone se il cristallo è munito di trattamento anticalcare Shining Glass®.

Per la pulizia ordinaria utilizzare panni morbidi e detersivi liquidi neutri e non abrasivi..

Attenzione: Non usare panni con fibre sintetiche, spugne abrasive, tamponi con fili metallici, detersivi solidi o liquidi contenenti abrasivi, alcool, acidi di uso domestico, acetone o altri solventi perché intaccano le superfici.

Essuyer le produit après chaque utilisation prévient la formation de calcaire sur les vitres.

En cas d'importants dépôts calcaires, il est conseillé d'utiliser du jus de citron.

ATTENTION: Ne pas utiliser de jus de citron si le verre est doté du Traitement Anti-calcaire Shining Glass®.

En cas de dépôt calcaire important, l'utilisation de jus de citron est recommandée.

ATTENTION: Ne pas utiliser de chiffons à base de fibres synthétiques, d'éponges abrasives, de tampons inox, de détergents solides et liquides contenant des produits abrasifs, d'alcool, d'acides à usage domestique, d'acétone ou tout autre solvant pouvant endommager la surface.

Dry off product with a soft cloth after usage to prevent limescale accumulation.

Use lemon juice to clean limescale deposits.

CAUTION Do not use lemon juice on glass with Shining Glass® treatment.

Use soft cloths and non-abrasive mild liquid detergents for cleaning.

CAUTION: Do not use synthetic fibre cloths, scouring pads, metal pads, abrasive detergents whether liquid or solid, alcohol, acids for domestic use, acetone or other solvents, which would damage the surface.

plylite

Materiale composito multistrato ad elevata densità con finitura superficiale vinilica poliuretanica, PlyLite garantisce un'elevata resistenza strutturale ed inalterabilità nel tempo, unite ad una grande facilità di pulizia. La texture superficiale rende il piatto antiscivolo ed è disponibile in tre varianti colore.

Matériau composite multicouches à densité élevée pourvu d'une finition de surface vinylique polyuréthanique, PlyLite offre une importante résistance structurale ainsi qu'une durabilité élevée tout en assurant une grande facilité d'entretien. Le receveur est revêtu d'une texture antidérapante disponible en trois couleurs différentes.

Being made of high density composite material with polyurethane vinyl finish, PlyLite guarantees high strength and long-lasting good looks while being very easy to clean. The surface texture makes the tray non-slip. Available in three alternative colours.

rug
rug wall

rug

Il piatto Rug aggiunge alle già note caratteristiche del PlyLite un piano calpestabile soffice, che rende più confortevole la permanenza in doccia. Rug presenta un bordo contenitivo rigido, sede ideale per l'installazione della chiusura doccia, ed un copripiletta ispezionabile nella medesima finitura. Al piatto Rug è possibile abbinare i pannelli di rivestimento murale Rug Wall, vedi pag. 217.

En plus des caractéristiques habituelles du PlyLite, le receveur Rug est doté d'une surface souple qui rend encore plus agréable le moment de la douche. Rug propose un bord rigide, qui constitue un siège idéal pour installer la paroi de douche, ainsi qu'une bonde dotée d'un couvercle démontable de la même finition que le receveur. Le receveur Rug peut être assorti aux panneaux de revêtement muraux Rug Wall, voir pages 217.

Rug shower tray adds another feature to those already mentioned of PlyLite: a surface that is soft to stand on, so that taking a shower becomes even more comfortable. Rug has rigid edges that can accommodate shower enclosures; waste cover in the same finish can be removed for inspection. Rug Wall panels can be fitted with Rug shower tray, see pages 217.

rug wall

I pannelli di rivestimento murale Rug Wall consentono di creare una continuità tra piatto e pareti, risolvendo efficacemente ogni necessità di sostituzione della vasca con un'area doccia. Estremamente maneggevoli ed adattabili ad ogni situazione preesistente, i pannelli Rug Wall si installano rapidamente senza richiedere competenze specifiche.

Sono disponibili in due versioni, orizzontale o verticale, per venire incontro ad ogni esigenza e soddisfare anche piccoli budget.

Les panneaux de revêtement muraux Rug Wall permettent de créer une continuité entre le receveur et les murs ce qui aide à résoudre aisément toute nécessité de remplacement d'une baignoire par un espace douche. Très maniables et s'adaptant à toute situation, les panneaux Rug Wall s'installent rapidement sans qu'aucune compétence particulière ne soit nécessaire. Ils sont disponibles en deux versions, horizontale ou verticale, pour répondre à tout type d'exigence et satisfaire aussi les petits budgets.

When replacing a bathtub with a shower area, installing Rug Wall panels ensures there is no gap between tray and walls. Rug Wall panels are quick to install since they need no specific skills, being extremely easy to handle and adaptable to all existing situations.

Available in two versions - horizontal or vertical - to cater to all needs as well as small budgets.

calce

I piatti Calce sono forniti con la finitura sui quattro lati. I piatti di forma quadrata o rettangolare possono essere rifilati in utenza per meglio adattarsi al contesto installativo. In questo caso si precisa che la zona rifilata perde la finitura e si consiglia pertanto di posizionare i lati rifilati contro parete. Per le rifilature si raccomanda di attenersi alle indicazioni riportate nel manuale tecnico.

Les receveurs Calce sont fournis avec une finition sur les quatre côtés. Les receveurs de forme carrée ou rectangulaire peuvent être coupés sur place pour les adapter au lieu d'installation. La partie coupée perdant alors sa finition, il est conseillé de la positionner contre le mur. Pour le découpage veuillez consulter attentivement les instructions reportées sur la fiche technique.

Calce shower trays are supplied with all four sides finished. Squared or rectangular shower trays can be trimmed to size during installation. In this case the trimmed area loses its finish and should therefore be placed against the wall. For shower tray trimming we strongly recommend to follow instructions reported on technical sheet.

dune

I piatti Dune sono forniti con la finitura sui quattro lati. I piatti di forma quadrata o rettangolare possono essere rifilati in utenza per meglio adattarsi al contesto installativo. In questo caso si precisa che la zona rifilata perde la finitura e si consiglia pertanto di posizionare i lati rifilati contro parete. Per le rifilature si raccomanda di attenersi alle indicazioni riportate nel manuale tecnico.

Les receveurs Dune sont fournis avec une finition sur les quatre côtés. Les receveurs de forme carrée ou rectangulaire peuvent être coupés sur place pour les adapter au lieu d'installation. La partie coupée perdant alors sa finition, il est conseillé de la positionner contre le mur. Pour le découpage veuillez consulter attentivement les instructions reportées sur la fiche technique.

Dune shower trays are supplied with all four sides finished. Squared or rectangular shower trays can be trimmed to sizes during installation. In this case the trimmed area loses its finish and should therefore be placed against the wall. For shower tray trimming we strongly recommend to follow instructions reported on technical sheet.

acryl

Materiale dalle indubbe qualità, da anni ampiamente diffuso nel settore bagno, l'acrilico presenta una superficie brillante ed uniforme, inalterabile e di facile pulizia combinata ad una struttura di rinforzo in resina di poliestere e fibre di vetro che conferisce solidità e prestazioni elevate al piatto doccia.

Matériel de qualité indiscutable, largement répandu depuis des années dans le secteur de la salle de bain, l'acrylique possède une surface brillante et uniforme, inaltérable et facile à nettoyer, associée à une structure de renfort en résine de polyester et fibre de verre, qui font de ce receveur un produit d'une grande solidité aux performances élevées.

Material of indisputable quality that has been used for years in bathrooms, acrylic with its durable, shiny, seamless, easy-to-clean surface is combined with a fibreglass reinforced polyester structure in order to guarantee strength and great performance.

rocker

L'innovativa lastra in acrilico con superficie materica effetto ardesia dona al piatto doccia Rocker un aspetto estremamente naturale ed autentico. Rocker unisce così alle caratteristiche tradizionali dell'acrilico (leggerezza, resistenza a graffi e abrasioni, resistenza ai raggi UV, facilità di installazione e manutenzione) un'estetica raffinata e unica nel suo genere. L'altezza ridotta di soli 35mm permette un'installazione in appoggio o a filo pavimento, massimizzando estetica e praticità di utilizzo.

L'innovative plaque en acrylique avec touché effet ardoise donne au receveur Rocker un aspect extrêmement naturel et authentique. Rocker arrive à unir aux caractéristiques traditionnelles de l'acrylique (légèreté, résistance aux égratignures et abrasions, résistance aux UV, facilité d'installation et entretien) une esthétique raffinée et unique dans son genre. L'hauteur réduite de 35mm permet une installation au sol ou à l'italienne, tout en garantissant un résultat esthétique et pratique.

The innovative acrylic sheet with slate effect gives Rocker an extremely natural look, hardly distinguishable from the real stone. Rocker combines the traditional features and qualities of acrylic (lightness, resistance to scratches and abrasion, resistance to UV, easy installation and easy maintenance) with a unique and sophisticated appearance. Reduced height of 35mm allows both built-in or floor-mounted installation, satisfying both practical and aesthetic requirements.

Pulizia e Manutenzione_Nettoyage et Entretien_Cleaning and Maintenance

Ogni superficie, se viene correttamente e regolarmente mantenuta, mantiene inalterate le sue caratteristiche nel tempo.

Ecco i consigli per un corretto mantenimento dei piatti Glass:

Toute surface, entretenue correctement et régulièrement, maintient ses caractéristiques inaltérées dans le temps.

Voici les conseils pour un entretien correct des receveurs Glass:

With proper, regular care all the surfaces will retain their original features over the years. Here are a few tips on how to care for Glass shower trays:

La pulizia ordinaria può essere effettuata semplicemente con acqua e detersivi neutri, strofinando con un panno morbido. La finitura vinilica poliuretana del PlyLite garantisce un'ottima resistenza all'abrasione e al graffio, infatti è possibile trattare lo sporco ostinato con l'impiego di spugne leggermente abrasive (tipo quelle per le pentole anti aderenti) o spazzole dalle setole non troppo dure, in combinazione con comuni detersivi per il bagno presenti sul mercato, avendo cura di leggerne attentamente le modalità d'impiego.

Le nettoyage ordinaire peut être effectué simplement avec de l'eau et un détergent neutre, en frottant avec un chiffon doux. La finition vinylique polyuréthane du PlyLite garantit une excellente résistance aux abrasions et aux rayures. Il est en effet possible de nettoyer la saleté incrustée avec des éponges légèrement abrasives (celles utilisées pour nettoyer les casseroles anti-adhérentes) ou des brosses dont les poils ne sont pas trop durs, en combinaison avec des détergents habituels pour salles de bain vendus dans le commerce, en ayant soin d'en lire attentivement le mode d'emploi.

Simply rub with a soft cloth using water and mild detergent for routine cleaning. The vinyl polyurethane finish of PlyLite ensures excellent resistance to abrasion and scratches and stubborn dirt may be removed using lightly abrasive sponges (such as those for non-stick pans) or brushes with relatively soft bristles and common bathroom cleaners, taking care to read the manufacturer's instructions for use.

La pulizia ordinaria può essere fatta attraverso la stesura di normali prodotti detersivi, come sgrassatori, pulitori per ceramiche e anticalcare avendo cura a non eccedere nelle quantità e nei tempi di esposizione. Si impiegano panni morbidi per le superfici lucide, mentre le superfici effetto pietra o opache sopportano l'impiego della spugna per lavare i piatti (leggermente abrasiva) usata delicatamente e non in maniera prolungata. Segni ostinati possono essere rimossi con l'utilizzo della gomma bianca per cancellare la matita. In casi eccezionali e straordinari (ad esempio per la rimozione di macchie di vernice o tinteggiatura), possono essere utilizzate poche gocce di acetone imbevute su un panno morbido, avendo cura di risciacquare accuratamente dopo l'uso.

Le nettoyage ordinaire peut être effectué en utilisant des produits détergents normaux comme des produits dégraissants, des produits pour céramiques et des anticalcaires en ayant soin de ne pas exagérer dans la quantité et le temps de pose. Des chiffons doux doivent être utilisés pour les surfaces brillantes alors que pour les surfaces effet pierre ou mat on peut se servir d'éponges légèrement abrasives, de manière délicate et non prolongée. Les taches résistantes peuvent être éliminées avec les gommages blanches servant pour effacer le crayon à papier. Dans les cas exceptionnels et extraordinaires (par exemple l'élimination de taches de peinture ou de teinture), il est possible d'imbibber un chiffon doux de quelques gouttes d'acétone en ayant soin de bien rincer après l'usage.

Use normal cleaners, such as degreasers, ceramic cleaners and limescale removers for routine cleaning, taking care not to exceed the recommended quantities and dwell time. Use soft cloths for glossy surfaces. A washing-up sponge (gently abrasive) may be used on stone-effect surfaces or matt surfaces provided it is done with a delicate touch and not for very long. Stubborn marks may be removed using a white rubber (the type used for pencil marks). In exceptional circumstances (e.g. to remove splashes of paint), a few drops of acetone on a soft cloth may be used, taking care to rinse thoroughly after use.

La pulizia quotidiana va eseguita con panni morbidi inumiditi con detersivi blandi e assolutamente non abrasivi. Vanno evitati i detersivi che contengono alcool.

Solo per i piatti doccia Planor e Cinco: un'operazione straordinaria di manutenzione può consistere nel trattamento con pasta lucidante (polish da carrozziere) per riportare il piatto all'originaria lucentezza persa negli anni.

Le nettoyage quotidien doit être effectué avec un chiffon doux humecté et un détergent délicat absolument pas abrasif. Les détergents contenant de l'alcool doivent être évités.

Seulement pour le receveur de douche Planor et Cinco: la maintenance extraordinaire peut être effectuée avec un produit polissant (polish de carrossier) pour redonner au receveur son brillant d'origine.

Use dampened soft cloths with mild, non-abrasive detergents for daily cleaning. Avoid using detergents that contain alcohol.

Only for Planor and Cinco shower trays: treat with polishing paste (car bodywork polish) to bring back the original shine, which may be lost over the years.

Resistenza ai prodotti di uso comune

Résistance aux produits d'utilisation commune

Resistance to commonly used products

Tutti i piatti doccia Glass 1989 sono sottoposti a rigide prove di resistenza secondo la norma UNI EN 14527 della direttiva europea, superando brillantemente i tests previsti. La tabella riporta i risultati ottenuti su tutti i materiali utilizzati nella produzione di piatti doccia Glass.

Tous les receveurs de douche Glass 1989 ont été soumis à des tests sévères de résistance, conformément à la norme UNI EN 14527 de la directive européenne, qu'ils ont passé brillamment. Le tableau ci-dessous fournit les résultats obtenus sur tous les matériaux utilisés dans la fabrication des receveurs de douche Glass.

All Glass 1989 shower trays have passed the severe resistance tests in accordance with the standard UNI EN 14527 and relative European directive. The table below gives the results obtained on all the materials used in the manufacture of Glass shower trays.

1. GENERALITIES AND FIELD OF APPLICATION

1.1 These General Terms and Conditions of Sale (“General Conditions”) shall apply to any and all supply of products (“Products”) that will be executed to any client (“Client”) by Glass 1989 Srl. (“Seller”), even if these General Conditions are not expressly referred to, mentioned or expressly accepted by the Client from time to time, unless (i) included in the “Sale Contract”, (ii) included in documents following the Sale Contract and the content of the same has been accepted in writing by Seller. In any case, even if deviating provisions are agreed upon, these General Conditions shall apply for the parts not expressly disregarded.

1.2 In no case shall any general conditions of contract of Client be binding on Seller, even if mentioned or included in orders or in any other documents transmitted by Client to Seller.

2. PRODUCT PRICES

2.1 The Products shall be supplied at the prices agreed between the parties in the Sale Contract or, should no prices be mentioned in the Sale Contract, at the prices resulting from the price list of Seller in force when the Sale Contract has been executed.

2.2 Unless otherwise stated in writing, the prices of the Products included in Seller’s price lists, quotations and/or offers are in Euro, net of VAT and for delivery according to the Incoterms® ICC rule, latest version, Ex-Works (EXW) – premises of Seller indicated in the Sale Contract.

2.3 The prices may vary according to the costs of raw materials, services, labor, suppliers’ prices with 60 (sixty) days’ notice.

3. MATERIALS AND SAMPLES

3.1 Catalogues, samples and price lists of the Products (with the exception of merely illustrative / advertising ones) made available to the Client by the Seller (“Materials”), must not be delivered, nor shown to third parties, nor reproduced, without prior written authorization by the Seller. The Materials must be returned at the simple request of the Seller.

3.2 Any representation and/or image relating to the Products included in websites, brochures, catalogues, price lists or other similar documents of Seller is approximate and purely illustrative. As a consequence, such representations and/or images do not represent the final aesthetic result of the Products. Technical and physical characteristics of the Products as well as qualities of the same are described in the technical manuals of Seller only. Any other document including technical and physical characteristics and qualities of the Products are purely indicative and shall not bind Seller.

4. ORDER

4.1 Unless otherwise specified by the parties, these Conditions are valid for each purchase order (“Order”).

4.2 By placing the Order, the Client declares that he read and fully accepts the Conditions.

4.3 By Order we mean any written request for purchasing the Product, made by the Client to the Seller by fax or e-mail or through the Seller’s portal (“Portal”), directly or through intermediaries (eg agents, promoters, etc.), with any related attachments (e.g. graphics card, technical specifications, drawings for non-standard sizes, etc.), to be considered an integral part of the Order itself.

4.4 The Order must in any case contain the following specific indications:

a) the identity of the Client (e.g. name, registered office, Tax Code / VAT number, e-mail, etc.);

b) code, quantity, special measures (also with drawing), model, color and version of the Product ordered and technical data sheets of any third party products (eg: hole for built-in sink, etc.);

c) place of destination of the Product.

4.5 Orders and / or Orders changes that have been made verbally and / or by telephone must always be confirmed in writing by the Client, as explained in art. 4.3.

4.6 The Contract will be effective only from the date of acceptance of the Order by the Seller, when the order confirmation is generated and sent by the Seller itself.

4.7 Orders and / or commitments made by collaborators, agents and / or other auxiliaries of the Seller do not in any way have the power to bind the Seller himself; therefore all Orders managed by the above mentioned subjects acquire validity and efficacy only with the Seller’s Order Confirmation.

4.8 For all that is not indicated in the Order, in any case will apply the technical / quality standards of the Seller, which the Client declares to know and to consider suitable for his needs.

4.9 The Seller reserves the right to cancel or modify at any time the characteristics and the Price of the Products in the Order, before issuing Order Confirmation. Consequently, the Products ordered may undergo changes in the characteristics and in the List Prices.

4.10 The Seller declines all responsibility for any inaccuracies and / or errors contained in the Orders sent by the Client.

4.11 For the realization of Products at the specific request of the Client (“customized- out of standard”) it is necessary to activate a feasibility request, before sending the Order. The Client must forward the request to the commercial office of the Seller, attaching a drawing with the technical characteristics of the requested Product. The Seller will issue a quotation with an indication of the price, of any technical specifications and of the relative delivery time; this quotation will be valid for 10 (ten) days from its issue.

5. ORDER CHANGES

5.1 The Client within and no later than 24 (twenty four) hours from the Order Confirmation, must report in writing any changes or discrepancies between the Order and the Order Confirmation; failing that, the Seller will begin the execution of the Contract under the conditions confirmed by the same.

5.2 It is understood that any changes to the Order by the Client, even if accepted by the Seller in the terms set out above, may result in modification of the Price and delivery time of the Products.

5.3 No Order confirmed by the Seller can be canceled or modified by the Client, unless the Client receives Seller’s written consent and on condition that the Client fully compensates the Seller for any loss (including loss of earnings), expense (including all labor costs and materials used) and damage resulting from this cancellation, against which the Seller will issue a debit note to the Client.

6. DELIVERY

6.1 The delivery date of the Product, indicated on the Order Confirmation, is approximate and is not binding on the Seller.

6.2 From the moment of delivery of the Product from the Seller to the Client (also by carrier), all risks will be borne entirely and exclusively by the Client.

6.3 The Seller reserves the right to deliver from different locations, depending on the type of product, and to make partial deliveries. The Seller reserves the right to apply price supplements for unique binding deliveries and for all transport situations considered at risk and / or according to the regulations of the various countries of destination of the Product.

6.4 No responsibility will be ascribed to the Seller and therefore nothing will be due to the Client when the delivery failure is not ascribable to the Seller himself. As such will be considered, by way of example and without limitation: omissions, defects and / or delays of third parties, including suppliers and subcontractors, causes of force majeure.

6.5 In any case, the Client will not be able to invoke the delay in delivery of the Products to terminate the Contract or delay the payment of the Products or request any damages and / or penalties from the Seller.

6.6 The delivery of the Products, even if partial, cannot be refused by the Client.

7. TRANSPORT

7.1 Unless otherwise agreed, the Products are understood to be sold “Ex-Works of the Seller factory” or “Ex-Works” Incoterms® 2020, having the Seller more production sites the location of the Seller’s factory may vary depending on the type of goods.

7.2 Transport, even if organized by the Seller on request and / or in the interest of the Client, is always at the expense and risk of the latter.

8. PRODUCT CONTROL

8.1 It is responsibility of the Client to check the Products received, subject of the Order / Order Confirmation, check the correspondence of the number of packages, of the characteristics and dimensions, as well as the integrity of the Product.

9. PRODUCT INSTALLATION AND USE

9.1 Sellers declares that the Products are compliant with the applicable Italian and European industry standards. Any Products shall be used and applied in accordance with the instructions of use of SELLER included in catalogues and/or technical manuals of SELLER with reference to the Products in question or with the instructions in other way communicated and/or made available by SELLER to CLIENT and, in any case, in accordance with the diligence required by the nature of the Products. Failing to do so, CLIENT will result in the lapse of the warranty and in the in unenforceability of the warranty rights under article 11 below or of any other legal or agreed warranty.

10. COMPLAINTS AND RETURNS

10.1 If the Client finds flaws and defects in the Product, he must report them to the Seller within 8 (eight) days of delivery, under penalty of forfeiture.

10.2 Any complaint must be made in writing, by registered mail, fax or certified mail (PEC), describing in detail the nature of the problem / defect, indicating all the necessary references (e.g. order number, delivery note or invoice) and attaching photos of the Product.

10.3 Returns of Products are not accepted without the prior written consent of the Seller.

10.4 In case of authorized returns, the Products must be delivered to the Seller’s premises or elsewhere indicated by the Seller. The authorization to return the Products or samples of the purportedly non-conforming or defective Products shall never be interpreted as an acknowledgment of the claimed non-conformities or defects on the part of Seller.

10.5 The returned Product must be returned in perfect condition and properly packaged, otherwise the Seller will not accept any returns.

10.6 The Seller, unless otherwise agreed, will not accept the replacement or refund for Products already used or already installed.

10.7 Upon returning to the Seller, the Products are carefully checked by Seller personnel in charge; in case no defects / production defects attributable to the Seller are found on the returned Product, the same will remain available to the Client for its collection; after 15 (fifteen) days from the communication of non-acceptance of the return, if the Product will not be collected by the Client, the Seller will have the right to dispose it.

11. WARRANTY

11.1 The warranty period is 24 (twenty-four) months from the date of collection of the Products from the premises of Seller, regardless of the agreed Incoterms® rule for delivery.

11.2 The following are expressly excluded from warranty:

a) indirect damages possibly caused to other objects or to any other element that is not part of the claimed Product;

b) the replacing costs of the Product.

c) defects / damage resulting from normal wear and tear of components and / or from non-compliant use of the Product;

d) the Products installed and/or used not in compliance with the instructions and/or indications provided by Seller included in the catalogues and price lists of Seller or in other way communicated to Client by Seller.

e) chromatic alterations and tone differences of the Products;

11.3 The Seller’s warranty on the Products expires in the event of:

a) defects / damage to the individual components of the Product due to faulty installation that has not been performed correctly, defects/damage to hydraulic and electrical connections made by unskilled personnel and / or not compliant with the standards in force in the country of production / installation and / or not compliant with the Product instructions;

b) defects / damages caused by the transport of the Products or to the individual components of the same;

c) defects / damage caused to the individual components of the Product, deriving from disassembly, assembly and installation, manipulations and modifications made by the Client;

d) defects / damage to elements and / or structures that house other components (e.g. taps, sinks, etc.), if they are not supplied by the Seller.

12. RESERVE OF OWNERSHIP

12.1 Seller will maintain exclusive ownership over the Products sold until their price has been entirely paid by Client.

13. PAYMENTS

13.1 Client shall pay for the Products in accordance with the payments methods and terms provided for in the Sale Contract or otherwise agreed upon in writing between the parties. No payment shall be considered as being made by Client until the relative amount has been credited to the bank account of Seller.

13.2 Payment by Client by different means than those indicated by Seller must be accepted by the Seller; if payment is made by cheque or bills of exchange, they will be accepted “subject to clearance”.

13.3 For no reason the Client can defer and / or suspend the payments of the due amounts beyond the indicated deadlines.

13.4 If delinquent amounts and late payment interest remain unpaid 30 (thirty) days after the agreed deadline for payment, then Seller may also, at its option, alternatively or cumulatively, and in addition to any other right or remedy available at law or pursuant to these General Conditions:

a) request accelerated payment of any and all remaining payments and declare due the total outstanding balance, even if payment by instalment or deferred payment has been agreed upon and/or bills of exchange, promissory notes, cheques or other payment documents have been issued and are falling due;

b) terminate the Sale Contract in question and definitively withhold any amount received in regard to such Sale Contract or to other Sale Contracts, offsetting the Client’s outstanding debt against any and all sums already paid by Client;

c) carry out future deliveries of Products on a pre-payment basis only, also with reference to supplies still to be executed;

d) cancel discounts and bonuses that may have been agreed between the parties also with reference to Sale Contracts already regularly executed.

13.5 Any advance payments received by the Seller are considered interest-free and will be returned without any interest, in case the Seller does not intend to accept the Client’s Order. The advance will remain, however, acquired by the Seller if the Order is canceled by the Client without compliance with the art. 5.

13.6 The receipt of the invoice without any contextual written claim by the Client, implies the recognition the amount in the invoice.

13.7 For no reason, including claimed defects of the Products, the Client may suspend or delay the payment of the Products.

13.8 Failure by the Client to provide the guarantees requested by the Seller will give the right for termination to the Seller, without prejudice to compensation for damage.

14. OUTSTANDING PAYMENTS

14.1 If Client is delinquent in its payment obligation, Seller may:

a) obtain payment of late payment interest in accordance with the applicable law;

and

b) withhold ongoing and future deliveries, upon written notice to Client, until all delinquent amounts and late payment interest are fully paid.

14.2 In this case, it is Seller’s faculty to terminate the Contract for default of the Client, without prejudice to compensation for damage.

15. DEFAULTS

15.1 In the event of bankruptcy or admission to bankruptcy proceedings of the Client, or in the event of the Client being subject to executive procedures and / or protests or, in general, in case of changes in the financial capacity of the Client or if any defaults occur, without prejudice to the hypothesis of resolution, the Client’s debts are considered immediately payable and the Seller will have the right, to withdraw from the Contract, without notice, by sending a registered letter with return receipt or by sending certified mail (P.E.C.), without prejudice to compensation for damage.

15.2 The execution of the Contract may be suspended at any time in the event of a change in the Client’s equity conditions.

15.3 In the event that the Contract is terminated, any sum of money owed will become due and any sum of money already paid by the Client will remain to the Seller and the Products not yet paid will be immediately returned to the latter, at the risk and expense of the Client, with the obligation to pay a 10%(ten percent) penalty of the Price, for each day of delay in return.

16. CONFIDENTIALITY AND EXCLUSIVITY

16.1 Client undertakes: (i) to treat with the utmost confidentiality all the information/data/designs/knowhow/documentation transmitted by Seller or that it may come to know in connection with the execution of any Sale Contract, even if they is not marked or identified as secret or confidential (“Confidential Information”); (ii) not to, wholly or partially, disclose to or inform third parties of the Confidential Information, without the Seller’s prior written consent; (iii) to limit the use of the Confidential Information and the access to the same for purposes relating to the execution of the sale Contracts; (iv) to adopt any and all measures required in order for its employees and collaborators do not disclose the Confidential Information to third parties or use it in an inappropriate way. The Confidential Information shall not be copied or reproduced in any way, unless with the prior written consent of Seller, and all the copies of the Confidential Information shall be immediately returned to Seller upon simple written request of the same.

16.2 The above obligations are assumed for the entire duration of the Contract as well as for 10 (ten) years following its execution. Failing that, Client will be obliged to compensate the damage to Seller.

17. JURISDICTION AND APPLICABLE LAW

17.1 For any dispute relating to the contractual relations here regulated, without prejudice to the faculty of a different choice of the Seller, the jurisdiction will be under Italian judicial authority and in particular the Court of Treviso; the applicable law will be the Italian one. For any Mediation or Assisted Negotiation procedures, the judicial authority will still be in Treviso.

17.2 If these Conditions are translated into any foreign language, it is expressly understood that in case of any conflict or discrepancy the text in Italian shall prevail over the text translated into any other foreign language.

18. MISCELLANEOUS

18.1 Unless otherwise agreed, all communications between the parties must be made in writing and sent to the address of the recipient indicated in the Contract or to the registered office of the recipient by registered mail, fax, e-mail or certified mail (PEC).

18.2 The graphic program that the Seller provides to the Client has the function of sales support only.

18.3 Quotations and confirmations deriving from the graphic program are subject to confirmation by the Seller for both prices and feasibility.

18.4 The technical data, measurements, prices, characteristics, materials, processes, suppliers / sub-suppliers, performance and all other data related to the Products shown in the Seller’s Materials and Samples are purely indicative and may be changed at the discretion of the Seller himself.

In compliance with the provisions of articles 1341 and 1342 of the Civil Code, the undersigned confirms that he has read and expressly approves the following clauses: 1. GENERALITIES AND FIELD OF APPLICATION; 2. PRODUCT PRICES; 3. MATERIALS AND SAMPLES; 4. ORDER; 5. ORDER CHANGES; 6. DELIVERY; 7. TRANSPORT; 8. PRODUCT CONTROL; 9. PRODUCT INSTALLATION AND USE; 10. COMPLAINTS AND RETURNS; 11. WARRANTY; 12. RESERVE OF OWNERSHIP; 13. PAYMENTS; 14. OUTSTANDING PAYMENTS; 15. DEFAULTS; 16. CONFIDENTIALITY AND EXCLUSIVITY; 17. JURISDICTION AND APPLICABLE LAW; 18. MISCELLANEOUS
